Senga Lindsay -

MBCSLA, ISA, NPD, ODH

Landscape Architect, Horticulturalist, Arbourist

Senga Lindsay brings 17 years extensive experience in landscape architecture, arbouriculture, planning and horticultural design to a wide variety of residential projects in British Columbia. She has a simple philosophy to great landscape design: "A site and you the client tells the story of what it wants to be and the art is in the listening.."

List of Services:

Landscape Architecture and Site Planning

Design and Build Landscapes

Green Roof Design and Build

Living Wall Design and Build

Lindsay Residence, Dining Area - N.Vancouver

Design Build Landscapes

Good design is attributed to positive and creative synergies developed with our clients. Our company is built on referrals and many of our clients have been with us since Senga Design's beginnings as Landscape Architects.

Senga has teamed up with a local and well respected landscape contractor **Blue Pine Enterprises Inc.** in the lower mainland to formulate a design/build company called '**Blue Senga Outdoor Living and Garden Design.**'

Under the helm of Senga Lindsay we can present you with an all in one solution where Senga will work with you one on one to develop a landscape concept that will carefully developed and constructed to fulfill your vision. However, if you prefer we always offer design services as a separate package.

Willi Residence, backyard w/water feature, W.Vancouver

Green Roofs Design Build

As a response to the growing interest for our clients looking to cut through the confusion We provide an all in one solution for green roof design and build services. In fact the studio of Senga Lindsay boasts its own green roof and outdoor patio space!

Our expertise ranges from traditional roof gardens to the latest green roof systems for low profile soils and plantings. Depending on your structure we can create roofs that can be used as living spaces, as edible gardens or as an alternative to traditional roof clad materials.
